Florence

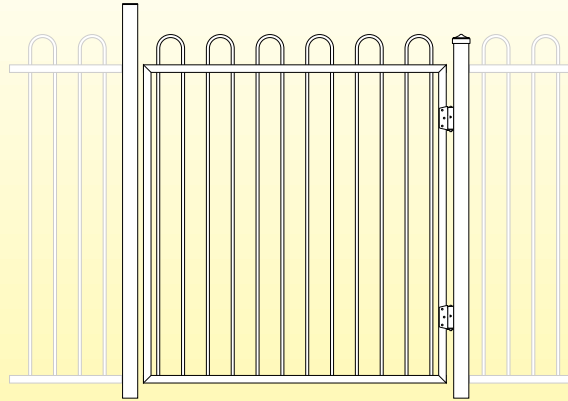

Naples

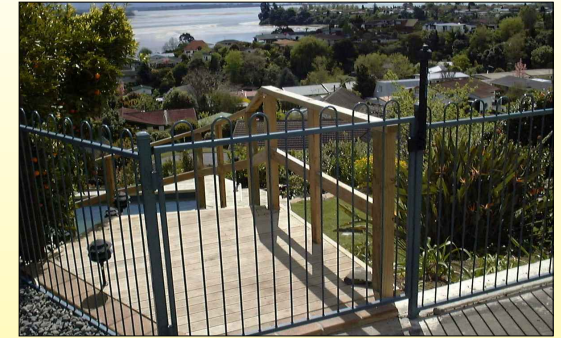

Milan

Safety Features

Stainless steel self closing hinges.

Magna-Latch.

Comet pool fences are fabricated from 'real steel and pipe' not wire, and are far stronger and more durable than others, giving your property that little 'extra something.' We use adjustable stainless steel self closing hinges, not plastic and the latch supplied is the industry standard Magna-Latch (Other latches available). Our range of colours is extensive and our products comply with NZ safety standards.

Finish Options
